## Clarity 6A/10G Category 6a TracJacks

Clarity 6A TracJacks now offer the elevated performance of quad reactance, minimizing internal crosstalk and reducing the injection of common mode noise, a significant source of alien crosstalk. These connectors work with Clarity 10G patch cords to provide a nearly transparent signal path for enhanced signal-to-noise (internal and alien) performance.

These front-loading jacks are icon-compatible and can be used in any TracJack workstation outlet. Meets TIA 568C.2 Category 6a component specifications.
