

CLARITY® PATCH PANELS

Clarity 6 and 5E

Clarity patch panels combine the Ortronics commitment to ease and reliability with the ETL verified TIA-568C.2 Category 6 or Category 5e performance of center tuned connector technology. These 110 termination 19" panels are available in six-port and eight-port module groupings, in 12, 24, 48, and 96-port sizes. Panels provide extensive designation abilities, icon compatibility and rear cable management.

- ETL verified to TIA component specifications to ensure component performance
- Center tuned to Clarity patch cords—more transparent mated union and higher channel performance
- Universal wiring supports T568A and B installations with linear 110 termination
- IDC housing handles both Category 6 and Category 5e conductors
- Supplied rear cable management supports cabling best practices
- High density design maximizes rack utilization
